

MARSHALL PUBLIC SCHOOLS PROJECT PROGRESS REPORT

June 2026 Update

MRS. NEEDLES KICKS OFF DEMOLITION

WHAT'S NEW?

Construction is officially underway on the Marshall Public Schools facility improvement project following the successful passage of the April 2025 referendum. Vogel Bros. mobilized to the site in May, establishing temporary fencing and laydown areas while beginning selective demolition activities at the Early Learning Center, Elementary School, and High School.

To help maintain the overall project schedule and minimize disruption to students and staff, demolition work began in occupied areas before the end of the school year. This early work will allow construction activities to accelerate throughout the summer months. A highlight of the month included Marshall Elementary Principal Mrs. Needles joining the team to participate in a ceremonial demolition kickoff.

Over the coming months, construction efforts will focus on completing summer work while continuing to coordinate closely with district staff to support school operations and prepare for the next phase of improvements.

WHAT'S NEXT?

- » Fully mobilize and complete demolition at all four schools
- » Complete saw-cutting, concrete removal, and underground plumbing for new bathrooms
- » Excavate for new footings & foundations

DID YOU KNOW?

The U.S. generates about 600 million tons of construction and demolition (C&D) debris annually.

LOCAL PARTNER SPOTLIGHT

Vogel Bros. Building Co. is a fifth-generation, family owned construction services company located in Madison, WI. Founded in 1875, the company has built its reputation on craftsmanship, integrity, and strong relationships, completing large-scale, complex projects while embracing innovation and new technologies.

Vogel Bros. has partnered with Marshall Public Schools, currently serving as the construction manager for the facility improvement projects.
