523.3

EMPLOYEES OCCUPATIONALLY EXPOSED TO BLOODBORNE PATHOGENS

The district shall strive to safeguard the health and well-being of district employees and promote a safe work environment. As required by law, an exposure control plan shall be developed and adopted for use in the district. The plan shall be designed to reduce an employee's exposure to the hepatitis B virus (HBV), human immunodeficiency virus (HIV) and other bloodborne pathogens in the workplace.

It is the district's full intention that, if necessary, the physical facility, work practices and other areas will be modified to attain the plan's goal. In addition, employees shall be informed and trained so that they, too, can contribute to the reduction and elimination of exposure.

To ensure that the exposure control plan is kept up to date, it shall be reviewed and amended annually, and whenever tasks are implemented which may affect occupational exposure.
